

<b>Date</b>	<b>Work done</b>
1/9 - 1/11	Build prototype for fixed screen sizes
1/12 - 1/13	Extended the prototype by extending it for different densities and dimensions. Experimented with many different layouts
1/14 - 1/15	Optimization of images so that they work with low memory conditions.
1/16 - 1/22	Making the wheel rotate. Improving it from being laggy to smooth by optimizing code
1/25 - 1/27	Implement wheel snapping along with implementing the functionality for letter forms [begin, middle, end, isolated]
1/29 - 1/31	Implement error-correction
2/1 - 2/4	Experiment with custom animations. Add custom animations for the menu and the info pane
2/5 - 2/7	Tried many different image optimization for the menu and detailed menu. Did not work.
